

AR15/M4/M16 2-DAY ARMORERS COURSE

The Allstar Tactical certified armorers course is a 2-Day Hands-On Intensive course covering the skills needed to assemble, diagnose and repair malfunctions, function test, disassembly and cleaning, and more. Our armorers course is a combination of lecture, and hands-on exercises in order to ensure every student becomes proficient. Upon completion of our course, students will be able to build and assemble, repair, and maintain the AR15/M4/M16 platform with proficiency. Graduates will receive a three-year certificate.

All tools and anything else necessary will be provided. Students will receive a training manual with great reference materials to refer back to if need be. Rifles can be provided to students with prior arrangements. We prefer that our students bring their own rifle platforms to get familiar with their configurations and modifications.

This course is very knowledge intensive so be prepared!
